

## Single Use Podiatry Instruments

Rociale instruments are supplied sterile and ready to use, packaged individually in boxes of twenty, or in procedure specific sets with supplementary items like swabs, drapes and trays.

The instruments are packed and sterilised in the UK and carry Rociale's CE mark and brand.

Rociale instruments provide complete traceability.

### Lower costs

- The cost of the cleaning and sterilising of a reusable instrument often exceeds that of purchasing a new, single use instrument.
- When the appropriate share of the purchase price and repair costs of the reusable instruments are added to the cost of processing, the saving offered by single-use instruments is even greater.
- Similarly, it is important to include the number of reusable instruments that are lost or broken beyond repair before they reach their maximum number of re-sterilising processes.
- Some instruments have particularly long process times due to their intricate or complex design or to the type of material with which they are contaminated.

### Efficiency and Reliability

- Administration is reduced when Rociale single-use instruments are used, meaning less cost and less risk of error. How many surgical procedures are postponed because of administrative error, failure of the cleaning and sterilising process or because an instrument is lost or found to be broken after the process is completed?
- Clinicians using Rociale single use instruments will find it easier to cope with fluctuations in demand or when it is advantageous to focus on a particular procedure for a period of time. Insufficient reusable instruments can be a limiting factor, and costs may rise as the Sterilisation Department is forced to work unsociable or additional hours.

### Infection Control

- Rociale single-use instruments have never been used previously and so the risk of cross-contamination is dramatically reduced. This provides benefits including:
  - Lower costs – Infection extends a patient's treatment.
  - Reduced threat to the healthcare provider's reputation.

### Managed Service

- Rociale offers a fully managed service which minimises administration, optimises stock levels and features the removal of used instruments for recycling, (though they will never be medical products again).

**RSET2011 Podiatrist Pack**

Case Quantity: 20

- 1 x Nail Nipper, Curved
- 1 x Blacks Nail File, Fine, 13.5cm
- 1 x Foot Dresser, Diamond Dust
